

Summer Assignments2022

IB Biology SL/HL Year 1

1. Students should primarily complete the write-up of their **1st IA draft** (all information about the format and samples of written IAs can be found on our Moodle shell).

Note: Students who have a difficulty with collecting their data should seek advice in time and email Dr. Prodromidi.

2. Students should study from their textbook **Option D. Human Physiology** and take their own notes (either hand-written or digital)

Note: Students may be helped in their studying by Teacher-made ppt notes about Option D, which can be found on our Moodle shell. Students may also study on their own any other of the three remaining Option topics, if they wish to be assessed on one of these and again take their own notes.
