

“ THE TRUTH BEHIND FAKE NEWS

How many times have you
come across news that looks
fake?

Join our workshop to learn why
fake news is created and how
to spot them by becoming
someone who spreads them
for one day!

Alexandra & Charoula

THE IMPACT OF COVID-19 ON OUR PLANET

Covid-19 has strongly affected our
lives but have you ever thought
how our planet faces this crisis?
Was the pandemic beneficial or
harmful for the environment?
Join us to learn more and think
out of the box!

Petros Gkenos

UNDER PRESSURE

Are you pressured into doing
things you don't want to? Or
maybe into doing things that
aren't good for you?

In this workshop, we are going to
walk you through the different
types of pressure teens have to
face and discuss the importance
of being able to say no.

Maria Gavriilidou

GENETICALLY MODIFIED FOOD

We have all heard of the term
Genetically Modified Food, but do
we truly know what they are?
In this workshop we will learn
everything we need to know
about them.

HOW TO ESCAPE FROM A MULTIFACETED HOUSE

A person has gone missing in the corner house at the Intersection between Bio and Psyche streets and everyone in the neighborhood is in the lookout. In this workshop you are the detectives assigned to the case but you find yourselves locked in the house that looks big and bright on the outside but dark and messy on the inside. In order to solve the mystery, find the missing person, and escape the house you should not just exercise your detective skills but you should also use your scientific knowledge!

Kewei Li & Yi Rui Wang

GAME DEVELOPMENT- PI GAME

Sonic Pi is a platform where you can create every kind of music and even use it in live concerts. In this workshop you will learn coding while writing your own music, and at the end of the training you will be able to make the computer compose by itself. If you are curious about where music and coding combine, this is the workshop for you!

Yagmur Aytemiz & Demir Alp

COMPUTER VISION WITH OPEN CV

OpenCV is a Python library that is mainly used for real-time image processing and computer vision. In this course, we will look at different methods and functions used within this library and look at some different types of implementations for this library.

Yoel Nasi & Altan Unver

WEB SITE DESIGN WITH HTML/CSS

In this workshop, you will learn how to create websites that we use frequently in daily life with HTML and CSS. We aim for you to use these simple programming languages in the future while also having fun. If you are interested in the behind-the-scenes of websites, we welcome you to our workshop!
